

Set 1

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB1.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a new column Email.
 - Display students whose **age is greater than 20**.
1. **If:** Write a program to check whether a number is positive.
 2. **If-Else:** Write a program to check whether a number is even or odd.
 3. **Nested If-Else:** Write a program to check whether a person is eligible to vote and, if eligible, check whether they are a senior citizen.
 4. **If-Elif-Else:** Write a program to display a grade based on marks: A for 80+, B for 60–79, C for 40–59, otherwise Fail.
 5. **Loops:** Write a program to print numbers from 1 to 20 using a loop.
 6. **Match-Case:** Create a simple calculator using `match-case` for +, −, *, and /.
 7. **Dictionary:** Create a dictionary containing a student's name, age, address, and grade, then display all values.
 8. **List:** Create a list of 10 numbers and find the largest number.
 9. **Functions:** Create a function that accepts two numbers and returns their sum.
 10. **Variable Scope:** Write a program demonstrating the difference between a local variable and a global variable.

Set 2

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB2.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a new column Phone. Display students whose **age is less than 20**.
1. **If:** Write a program to check whether a number is divisible by 5.
 2. **If-Else:** Write a program to determine whether a student has passed or failed based on 40 marks.
 3. **Nested If-Else:** Check whether a person is eligible for a driving license and then check whether they are eligible for a motorcycle or car license.
 4. **If-Elif-Else:** Display a message according to temperature: Hot, Warm, Cold, or Very Cold.
 5. **Loops:** Print all even numbers from 1 to 50 using a loop.
 6. **Match-Case:** Create a program that displays the name of a day when the user enters a number from 1 to 7.
 7. **Dictionary:** Create a dictionary of 5 students and their marks. Display the marks of a selected student.
 8. **List:** Create a list of 10 numbers and calculate their total.
 9. **Functions:** Create a function that accepts a number and returns its square.
 10. **Variable Scope:** Demonstrate how a local variable behaves when a variable with the same name exists globally.

Set 3

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB3.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a new column Gender.
 - Display students whose **age is greater than or equal to 20 AND marks are greater than 70.**
1. **If:** Write a program to check whether a person's age is 18 or above.
 2. **If-Else:** Write a program to check whether a number is positive or negative.
 3. **Nested If-Else:** Check whether a student is eligible for an exam and, if eligible, check whether they have paid the examination fee.
 4. **If-Elif-Else:** Display a student's division based on percentage: Distinction, First, Second, Third, or Fail.
 5. **Loops:** Print the multiplication table of a number entered by the user.
 6. **Match-Case:** Create a menu using `match-case` for Tea, Coffee, Juice, and Water.
 7. **Dictionary:** Create a dictionary containing employee ID, name, department, and salary. Display the employee information.
 8. **List:** Create a list of numbers and count how many numbers are greater than 50.
 9. **Functions:** Create a function to calculate the area of a rectangle.
 10. **Variable Scope:** Write a program demonstrating a global variable modified using the `global` keyword.

Set 4

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB4.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a new column Email.
 - Display students who are from **Kathmandu OR Pokhara**.
1. **If:** Check whether a number is greater than 100.
 2. **If-Else:** Check whether a person is eligible to vote.
 3. **Nested If-Else:** Check whether a username is correct and then check whether the password is correct.
 4. **If-Elif-Else:** Create a simple electricity billing system based on units consumed.
 5. **Loops:** Find the sum of numbers from 1 to 100 using a loop.
 6. **Match-Case:** Create a program to select a month based on numbers 1–12.
 7. **Dictionary:** Create a dictionary of a book containing title, author, price, and publisher. Display the information.
 8. **List:** Create a list and remove all duplicate values from it.
 9. **Functions:** Create a function that accepts three numbers and returns the largest.
 10. **Variable Scope:** Demonstrate local, global, and enclosing variables using nested functions.

Set 5

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB5.
- Use the database.
- Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
- Insert 10 records.
- Modify the datatype/size of the Name column.
- Display students whose **marks are between 60 and 80**.

1. **If:** Check whether a number is divisible by both 3 and 5.
2. **If-Else:** Check whether a character is a vowel or consonant.
3. **Nested If-Else:** Check whether a student passed in English and, if so, check whether they also passed in Mathematics.
4. **If-Elif-Else:** Display a person's age category: Child, Teenager, Adult, or Senior.
5. **Loops:** Print all odd numbers between 1 and 100.
6. **Match-Case:** Create a calculator using `match-case` with four arithmetic operations.
7. **Dictionary:** Store five subject names and their marks in a dictionary and calculate the total marks.
8. **List:** Create a list of student marks and calculate the average.
9. **Functions:** Create a function to calculate the factorial of a number.
10. **Variable Scope:** Create an example showing how the `nonlocal` keyword changes an enclosing variable.

Set 6

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB6.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a column Email.
 - Display students whose **age is 20 OR marks are greater than 85**.
1. **If:** Check whether a number is a multiple of 10.
 2. **If-Else:** Check whether a number is greater than, less than, or equal to 50 using appropriate conditions.
 3. **Nested If-Else:** Check whether a person has a valid ID and then check whether their age is sufficient for registration.
 4. **If-Elif-Else:** Create a simple restaurant billing category based on total bill amount.
 5. **Loops:** Calculate the factorial of a number using a loop.
 6. **Match-Case:** Display the name of a season based on a number from 1 to 4.
 7. **Dictionary:** Create a dictionary containing 5 countries and their capitals. Display all countries and capitals.
 8. **List:** Find the smallest and largest elements in a list.
 9. **Functions:** Create a function that accepts a number and determines whether it is prime.
 10. **Variable Scope:** Create a program showing that a local variable cannot normally be accessed outside its function.

Set 7

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB7.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Remove the Class column.
 - Display students who are from **Kathmandu AND marks are greater than 75**.
1. **If:** Check whether a student's marks are greater than 80.
 2. **If-Else:** Check whether a given year is a leap year or not.
 3. **Nested If-Else:** Check whether a number is positive and then determine whether it is even or odd.
 4. **If-Elif-Else:** Display a message according to a student's attendance percentage.
 5. **Loops:** Print the first 10 multiples of a number.
 6. **Match-Case:** Create a menu for selecting different mathematical operations.
 7. **Dictionary:** Create a dictionary for a student containing name, roll number, five subject marks, and calculate the total.
 8. **List:** Search for a particular value in a list and display whether it exists.
 9. **Functions:** Create a function that accepts a list and returns its sum.
 10. **Variable Scope:** Create a program to demonstrate the use of the `global` keyword.

Set 8

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB8.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a column Phone.
 - Display students whose **address is Kathmandu OR Tanahun AND age is greater than 19.**
1. **If:** Check whether a person's salary is greater than Rs. 50,000.
 2. **If-Else:** Check whether a number is divisible by 2.
 3. **Nested If-Else:** Check whether a student has passed the theory exam and then check the practical exam.
 4. **If-Elif-Else:** Display a discount based on the shopping amount.
 5. **Loops:** Count the number of digits in a number using a loop.
 6. **Match-Case:** Display the type of vehicle based on a menu choice: Bike, Car, Bus, or Truck.
 7. **Dictionary:** Create a dictionary of 5 products with their prices and display products costing more than 1000.
 8. **List:** Reverse a list without using the built-in `reverse()` method.
 9. **Functions:** Create a function that accepts a name and displays a greeting.
 10. **Variable Scope:** Write a nested function demonstrating an enclosing variable.

Set 9

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB9.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Remove the Marks column.
 - Update the address of students whose address is **Pokhara** to **Kaski**.
1. **If:** Check whether a number is between 10 and 100.
 2. **If-Else:** Check whether a person is eligible for a scholarship based on marks.
 3. **Nested If-Else:** Check whether an ATM card is valid and then check whether the PIN is correct.
 4. **If-Elif-Else:** Create a grading system based on marks.
 5. **Loops:** Print numbers from 100 down to 1.
 6. **Match-Case:** Create a program that displays a subject name based on a menu choice.
 7. **Dictionary:** Create a dictionary of employees and their salaries and find the employee with the highest salary.
 8. **List:** Sort a list of numbers without using the built-in `sort()` method.
 9. **Functions:** Create a function that returns both the sum and average of three numbers.
 10. **Variable Scope:** Demonstrate the difference between `global` and `nonlocal` variables.

Set 10

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB10.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a column Section.
 - Update the marks of students who are **in Class 12 AND have marks less than 60** by adding 10 marks.
1. **If:** Check whether a number is a two-digit number.
 2. **If-Else:** Check whether a character is uppercase or lowercase.
 3. **Nested If-Else:** Check whether a user has entered the correct username and then verify their password.
 4. **If-Elif-Else:** Create a simple income-tax category system based on income.
 5. **Loops:** Print the Fibonacci series up to 10 terms.
 6. **Match-Case:** Create a simple ATM menu using `match-case`: Balance, Deposit, Withdraw, Exit.
 7. **Dictionary:** Create a dictionary of students and their marks and find the student with the highest marks.
 8. **List:** Find the second-largest number in a list.
 9. **Functions:** Create a function that checks whether a given string is a palindrome.
 10. **Variable Scope:** Create a program with a global variable and a local variable having the same name and observe the output.

Set 11

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB11.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a column Email.
 - Delete students who are **from Chitwan OR whose age is less than 19**.
1. **If:** Check whether a person's age is between 18 and 60.
 2. **If-Else:** Check whether a number is odd or even.
 3. **Nested If-Else:** Check whether a customer is a member and then apply a discount based on membership.
 4. **If-Elif-Else:** Display a student's result based on marks in multiple subjects.
 5. **Loops:** Count how many even and odd numbers exist between 1 and 100.
 6. **Match-Case:** Create a program that displays the number of days in a month based on the month number.
 7. **Dictionary:** Create a dictionary containing 5 cities and their populations. Display the city with the highest population.
 8. **List:** Combine two lists into one list without using +.
 9. **Functions:** Create a function that accepts a list and returns the largest element.
 10. **Variable Scope:** Create nested functions to demonstrate the LEGB scope rule.

Set 12

StudentID	Name	Age	Address	Class	Gender	Marks
101	Ram	20	Kathmandu	11	Male	78
102	Sita	19	Pokhara	12	Female	85
103	Hari	21	Tanahun	11	Male	67
104	Gita	22	Kathmandu	12	Female	91
105	Shyam	20	Pokhara	11	Male	72
106	Rita	18	Chitwan	12	Female	88
107	Binod	21	Tanahun	12	Male	74
108	Mina	19	Kathmandu	11	Female	82
109	Anil	20	Chitwan	12	Male	69
110	Sunita	22	Pokhara	11	Female	95
111	Ramesh	18	Tanahun	12	Male	61
112	Sarita	21	Kathmandu	11	Female	79
113	Bikash	20	Butwal	12	Male	84
114	Anita	19	Biratnagar	11	Female	76
115	Suman	22	Butwal	12	Male	89
116	Kamala	20	Pokhara	11	Female	73
117	Prakash	21	Kathmandu	12	Male	92
118	Nisha	18	Chitwan	11	Female	65
119	Roshan	19	Tanahun	12	Male	81
120	Pooja	22	Biratnagar	11	Female	87
121	Deepak	20	Kathmandu	12	Male	71
122	Manisha	21	Pokhara	11	Female	90
123	Kiran	19	Butwal	12	Male	68
124	Sabina	20	Tanahun	11	Female	77
125	Rajan	22	Chitwan	12	Male	83
126	Asha	18	Kathmandu	11	Female	59
127	Nabin	21	Pokhara	12	Male	86
128	Rekha	19	Butwal	11	Female	75
129	Ashok	20	Biratnagar	12	Male	70
130	Bina	22	Tanahun	11	Female	93

- Create a database named CollegeDB12.
 - Use the database.
 - Create a Student table with StudentID, Name, Age, Address, Class, and Marks.
 - Insert 10 records.
 - Add a column Phone and modify the Name column.
 - Display students whose **marks are between 70 and 90 AND address is Kathmandu or Pokhara.**
1. **If:** Check whether a number is positive, without using `else`.
 2. **If-Else:** Check whether a student has passed based on marks.
 3. **Nested If-Else:** Check whether a person is eligible to apply for a job and then check whether they have the required qualification.
 4. **If-Elif-Else:** Create a simple calculator that handles addition, subtraction, multiplication, division, and invalid operators.
 5. **Loops:** Find the sum of all even numbers from 1 to 100.
 6. **Match-Case:** Create a menu-driven program for Student Management: Add, View, Search, and Exit.
 7. **Dictionary:** Create a dictionary for 5 students containing their names and marks, then calculate and display the average marks.
 8. **List:** Remove all negative numbers from a list.
 9. **Functions:** Create a function that accepts a number and returns its factorial and whether it is even or odd.
 10. **Variable Scope:** Create a program demonstrating **local, enclosing, global, and built-in scopes.**
